

PawTrack Privacy Policy

Last Updated: September 6, 2026

Ausasi LLC (“Ausasi LLC,” “PawTrack,” “we,” “us,” or “our”) operates the PawTrack mobile application (“PawTrack” or the “App”).

PawTrack is a pet seizure and health record-keeping application designed to help pet owners document seizure episodes, track medications and symptoms, organize veterinary information, and prepare records for veterinary visits.

This Privacy Policy explains what information we collect, how we use it, how we store and share it, and the choices you have regarding your information.

By using PawTrack, you acknowledge the practices described in this Privacy Policy.

1. Who We Are

PawTrack is operated by:

Ausasi LLC — Tyler, Texas, United States

For privacy-related questions or requests, contact us at: ausasi.socials@gmail.com

2. Information We Collect

We collect information that you provide directly, information generated through your use of PawTrack, and certain technical information necessary to operate and improve the App.

A. Account Information

Depending on how you create and access your account, we may collect:

- Email address
- Phone number
- Name or other basic account information provided through Apple or Google
- Authentication information and account identifiers
- Information associated with Apple Sign-In or Google Sign-In
- Phone verification information

PawTrack may use third-party authentication providers, including Apple and Google, to help create and authenticate your account.

When you use Apple Sign-In or Google Sign-In, those providers may provide PawTrack with information such as your name, email address, and provider-specific account identifier, depending on the information and settings made available by the provider.

When you use phone-number authentication, PawTrack may use an SMS or identity-verification service to send verification codes.

3. Pet Information

PawTrack allows you to create and maintain profiles for your pets. You may provide information including:

- Pet name
- Species
- Breed
- Date of birth or age
- Sex
- Weight
- Pet photographs
- Microchip number
- Other identifying information
- Veterinarian information
- Emergency veterinary information
- Other notes you choose to provide

You control the information you enter into your pet's profile.

4. Seizure and Veterinary Information

PawTrack is designed to help you document your pet's seizure history and related veterinary information. Depending on the features you use, we may collect or store information including:

- Seizure date and time
- Time zone
- Seizure history
- Seizure duration or other episode details
- Symptoms before a seizure
- Symptoms during a seizure
- Symptoms after a seizure
- Pet behavior or mood
- Recovery information
- Recovery time
- Medication names
- Medication dosage
- Medication schedules and frequency
- Medication start and end dates
- Missed doses
- Diagnosis or seizure type information entered by you
- Other medical conditions entered by you
- Allergies
- Veterinary notes

- Veterinarian name
- Veterinary clinic or hospital name
- Veterinary phone number
- Veterinary email address
- Veterinary clinic address
- Veterinary specialty
- Emergency veterinary hospital information
- Other information you choose to include

This information is collected for the purpose of helping you organize and manage your pet's records. PawTrack does not use this information to diagnose or treat your pet.

5. Photos and Videos

PawTrack may allow you to record or import photographs and videos of your pet, including videos recorded during a seizure.

. Videos

Seizure videos are designed to remain on your device only. PawTrack does not upload your seizure videos to PawTrack's cloud servers or to any other cloud storage as part of the normal operation of the App. Videos stay on the device that recorded or imported them and are not part of the account data that syncs across your devices.

You may choose to share a video using your device's available sharing functions. Once you share a video outside PawTrack, the recipient and any third-party service you use may process that video according to their own policies.

If you save or export a video to your device's Photos/Gallery or another location outside PawTrack, deleting your PawTrack account does not automatically delete that separate copy.

. Photos

Pet photos may be stored and used as part of your pet profile and related App functionality.

Note: this section was corrected to accurately reflect that seizure videos never leave your device — an earlier draft of this policy incorrectly stated that videos were uploaded to cloud storage.

6. Device and Technical Information

When you use PawTrack, we may automatically collect certain technical information, including:

- Device type
- Device operating system
- App version
- Device identifiers or similar technical identifiers
- IP address
- Crash and error information
- Diagnostic information
- Performance information

- Usage and activity information
- Information about how you interact with the App

This information helps us operate, maintain, troubleshoot, secure, and improve PawTrack.

7. Analytics

PawTrack may use Google Analytics or similar analytics services to understand how users interact with the App. Analytics may include information about:

- Screens and features used
- How frequently features are used
- Button taps and interactions
- Session duration
- General usage patterns
- Whether users complete certain actions
- Device type and operating system
- Crash and error information
- App performance

We use analytics to understand how PawTrack is used and to improve functionality, reliability, and user experience. PawTrack does not use analytics to sell your personal information.

8. Notifications and Reminders

PawTrack may provide notifications and reminders, including:

- Medication reminders
- Seizure tracking reminders
- Follow-up reminders after a seizure
- Veterinary appointment reminders
- General App notifications

You may be able to control notification settings through PawTrack and/or your device settings. Where supported, you may choose whether notifications display detailed information or use more generic notification text.

To provide push notifications, PawTrack or its service providers may process technical information such as a device or push-notification identifier.

9. Location Information

PawTrack does not use GPS and does not collect your device's precise location. PawTrack may record the time and time zone associated with an event, such as a seizure, medication entry, or reminder, so that records reflect when an event occurred — this is a time-zone label, not a location measurement, and is not derived from GPS or any other location service.

Note: this section was corrected — an earlier draft of this policy incorrectly stated that PawTrack collects GPS or precise location data. It does not.

10. How We Use Information

We may use information collected through PawTrack to:

- Create and maintain user accounts
- Authenticate users
- Create and maintain pet profiles
- Record seizure episodes
- Track medications and reminders
- Track symptoms and behavior
- Organize veterinary information
- Generate veterinary visit-ready reports
- Allow users to export records
- Allow users to share information they choose to share
- Provide emergency contact features initiated by the user
- Send reminders and notifications
- Provide customer support
- Troubleshoot technical problems
- Detect and prevent fraud, abuse, or security issues
- Monitor and improve App performance
- Analyze App usage
- Maintain and improve PawTrack
- Comply with applicable laws and legal obligations
- Respond to lawful requests from government authorities
- Protect the rights, safety, and security of PawTrack, our users, and others

We do not sell or rent your personal information or your pet's information.

11. Veterinary and Emergency Features

PawTrack is designed as a tracking and record-keeping tool. PawTrack may allow you to:

- Generate veterinary visit-ready reports
- Export seizure and pet records
- Share information with a veterinarian
- Share information with family members or caregivers
- Share information with another PawTrack user
- Share seizure videos
- Contact a veterinarian
- Contact a veterinary emergency hospital
- Contact a saved emergency contact

Emergency contact features are user-initiated. PawTrack does not automatically contact a veterinarian, emergency hospital, emergency contact, or emergency services based solely on a seizure record or event. PawTrack does not guarantee that an emergency contact, veterinarian, veterinary hospital, or other recipient will receive or respond to a communication.

12. PawTrack Is Not Veterinary or Medical Advice

PawTrack is a tracking and record-keeping tool. PawTrack is not a veterinarian, veterinary clinic, emergency service, medical device, or veterinary treatment provider. PawTrack does not:

- Diagnose medical conditions
- Diagnose seizures
- Prescribe medications
- Recommend medication dosages
- Provide veterinary treatment
- Replace a veterinarian
- Guarantee the accuracy of any record or report
- Determine whether a seizure is an emergency

PawTrack may provide general educational information about seizures, medications, or related topics. Such information is provided for general informational purposes only and should not be treated as veterinary advice. Always consult a qualified veterinarian regarding your pet's medical care. If you believe your pet is experiencing a medical emergency, seek appropriate veterinary care immediately.

13. Sharing Your Information

We do not sell or rent your personal information or pet information. We may share or permit access to information in the following circumstances:

A. With People You Give Access To

Because a PawTrack account may be shared by multiple people, anyone with access to the shared account may be able to access the information available through that account. Shared account users currently have the same level of access and permissions. You are responsible for deciding who you allow to access your PawTrack account and for protecting your login credentials.

B. When You Choose to Share Information

You may choose to share information with:

- Veterinarians
- Veterinary clinics or hospitals
- Family members
- Caregivers
- Emergency contacts
- Other PawTrack users
- Other recipients using your device's sharing functionality

When you voluntarily share information, the recipient may use or further share that information according to their own practices and policies.

C. Service Providers

We may use trusted third-party service providers to help us operate PawTrack. These providers may process information on our behalf for purposes such as:

- Authentication

- Cloud database services (account, pet, and record data only — never seizure videos)
- Analytics
- App infrastructure
- Error and crash monitoring
- Security
- Email communications (such as account verification codes)
- Customer support
- Other services necessary to operate PawTrack

These providers are expected to process information only as necessary to provide their services to us and subject to appropriate contractual or legal protections.

D. Legal Requirements

We may disclose information if reasonably necessary to:

- Comply with applicable law
- Respond to a valid legal process
- Respond to a court order, subpoena, or government request
- Protect the rights or property of Ausasi LLC
- Protect the safety of users or others
- Investigate fraud, abuse, or security incidents
- Enforce our Terms of Service

14. No Sale of Personal Information

PawTrack does not sell or rent:

- User personal information
- Pet information
- Seizure history
- Medication records
- Veterinary records
- Pet photos
- Seizure records
- Other information you provide to PawTrack

PawTrack does not provide this information to third parties for their own advertising or marketing purposes.

15. No Third-Party Advertising

PawTrack does not currently display third-party advertisements. We do not use third-party advertising networks to serve advertisements based on your PawTrack information. If this changes in the future, we will update this Privacy Policy and applicable privacy disclosures before introducing such functionality.

16. Account Security

PawTrack supports account access through:

- Email and password (with a one-time verification code sent by email)
- Google Sign-In
- Apple Sign-In (where available)
- Phone-number authentication
- Biometric authentication where supported by the device

You are responsible for keeping your account credentials and authentication methods secure. We are continuing to develop PawTrack's security architecture. We will implement appropriate technical and organizational safeguards designed to protect information against unauthorized access, loss, misuse, alteration, or disclosure. No method of electronic transmission or storage is completely secure, and we cannot guarantee absolute security.

17. Local and Cloud Storage

PawTrack is designed to use both local device storage and cloud-based storage or synchronization for certain information. Information that may be stored or synchronized may include:

- Account information
- Pet profiles
- Seizure records
- Medication records
- Symptoms and notes
- Veterinary information
- Reports
- Other information associated with your PawTrack account

Seizure videos always remain on your device and are never uploaded to PawTrack's cloud storage — this is a permanent design choice, not a temporary limitation. The exact cloud storage provider and synchronization architecture for the non-video information above may change as PawTrack develops. We will update this Privacy Policy when the relevant service provider and implementation are finalized.

18. Data Retention

We retain information for as long as reasonably necessary to provide PawTrack and its features, maintain accounts, comply with legal obligations, resolve disputes, enforce agreements, and protect our services. If you delete information or your account, we intend to remove the applicable information from active systems promptly. Deleted information may remain in encrypted backups or disaster-recovery systems for up to 30 days before being permanently deleted or securely overwritten, unless a longer retention period is required by law or reasonably necessary for legitimate legal, security, or fraud-prevention purposes. Information stored separately on your personal device, including videos saved to your Photos/Gallery, is not automatically deleted when you delete your PawTrack account.

19. Your Privacy Choices and Rights

Depending on where you live and applicable law, you may have rights regarding your personal information. These may include the right to:

- Request access to personal information

- Request correction of inaccurate information
- Request deletion of personal information
- Request a copy or export of your information
- Request information about how your information is collected or used
- Object to or restrict certain processing where applicable
- Withdraw consent where processing is based on consent
- Exercise other rights provided by applicable law

PawTrack will honor applicable privacy rights based on the laws that apply to you. You may also manage certain information directly through the App.

20. Updating Your Information

Where supported, you may view, update, or correct information through your PawTrack account. This may include:

- Account information
- Pet information
- Veterinarian information
- Medication information
- Seizure records
- Other information that can be edited through the App

If you cannot change information through the App, you may contact us using the information provided below.

21. Data Export

PawTrack is designed to allow users to export or download information associated with their account. Depending on the available export functionality, this may include:

- Account information
- Pet profiles
- Seizure history
- Medication records
- Symptoms and notes
- Veterinary information
- Reports
- Other information stored by PawTrack

Because seizure videos are stored only on your device, those videos must be exported or shared directly from your device rather than through PawTrack's cloud data export.

22. Account Deletion

The designated account holder may request deletion of the PawTrack account. Deleting an account may result in the deletion of associated PawTrack data, including pet profiles, seizure records, medication records, notes, and other account-associated information, subject to applicable law and the retention practices described in this Privacy Policy. Because a PawTrack account may be shared by multiple people, only the designated account holder may permanently delete the shared account. Other users with access to the shared account cannot independently delete the entire shared account.

You may also be able to delete individual:

- Pet profiles
- Seizure records
- Photos
- Other records

Where applicable, you may request deletion by contacting us.

23. Customer Support

If you contact PawTrack support, you may voluntarily provide information necessary to help us resolve your issue. This may include:

- Account information
- Screenshots
- Error messages
- Diagnostic information
- Crash information
- Pet information
- Seizure information
- Other information you choose to provide

Support personnel may access information reasonably necessary to investigate and resolve a support request. We do not expect users to provide sensitive information that is unnecessary to resolve a support issue.

24. Children's Privacy

PawTrack is intended for adults and is not directed to individuals under 18 years of age. We do not knowingly seek to collect personal information from individuals under 18. If we learn that an account has been created by an individual under 18 where prohibited by applicable law, we may take steps to delete or restrict the account and associated information as required by applicable law. If you believe that a person under 18 has provided information to PawTrack, please contact us.

25. International Users and Data Transfers

PawTrack is intended to be available worldwide. Depending on where you live and where our service providers operate, your information may be processed or stored in the United States or other countries. Different countries may have different privacy laws from your country of residence. Where required by applicable law, we will implement appropriate safeguards for international transfers of personal information. The exact locations in which PawTrack data is stored or processed may depend on the cloud and service providers we use.

26. Third-Party Services

PawTrack may use third-party services to operate and improve the App. These may include:

- Apple Sign-In
- Google Sign-In
- Google Analytics
- Expo and Expo Application Services
- SMS or phone-number verification providers
- Email delivery providers (for account verification codes)
- Cloud database/storage providers
- Other infrastructure or security providers

The specific services used may change as PawTrack develops. Third-party providers may collect or process information according to their own privacy policies. Before launching PawTrack, we intend to provide links to the current privacy policies of the third-party services actually used by the App.

27. Third-Party Links and Sharing

PawTrack may provide functionality that allows you to open, share, or send information through third-party applications or services. We are not responsible for the privacy practices of third parties that you choose to use. For example, if you choose to share a seizure video, PDF report, or other record through your device's messaging, email, cloud-storage, or social-media applications, the information may be processed by those services according to their own policies.

28. Marketing Communications

PawTrack does not currently rely on advertising to operate the App. In the future, Ausasi LLC may send promotional or marketing communications about PawTrack, new features, educational content, promotions, or other services. Where required by applicable law, you will be provided with an appropriate way to opt out of marketing communications. Service-related communications, such as security notices, account notices, and important operational messages, may still be sent when necessary.

29. Subscriptions and Payments

PawTrack may introduce paid features, subscriptions, or in-app purchases in the future. If payment functionality is introduced, payments may be processed through third-party platforms such as Apple App Store, Google Play, or another payment provider. PawTrack does not currently represent that it directly collects or stores full payment-card information. If paid services are introduced, this Privacy Policy and the applicable disclosures will be updated to explain the relevant payment processing practices.

30. Social and Community Features

PawTrack does not currently provide public social or community features. Future versions of PawTrack may introduce features such as community discussions, public profiles, messaging, or other social functionality. If such features are introduced, we will update this Privacy Policy and applicable privacy disclosures to explain how information shared through those features is handled.

31. Changes to This Privacy Policy

We may update this Privacy Policy from time to time as PawTrack develops, laws change, or our privacy practices change. When we make changes, we may:

- Update the Privacy Policy within the App or on our website
- Update the “Last Updated” date
- Provide an in-app notification for significant changes
- Send an email notification for significant changes when appropriate or required

We encourage you to review this Privacy Policy periodically. Your continued use of PawTrack after an updated Privacy Policy becomes effective means that you acknowledge the updated policy, to the extent permitted by applicable law.

32. Applicable Privacy Laws

PawTrack will seek to comply with applicable federal, state, national, and international privacy laws that apply to Ausasi LLC, PawTrack, and its users. Privacy rights and obligations may differ depending on where a user lives and how PawTrack is used. Nothing in this Privacy Policy is intended to limit any privacy rights that cannot lawfully be limited under applicable law.

33. Contact Us

If you have questions about this Privacy Policy, want to exercise a privacy right, want to request deletion of your information, or have another privacy-related concern, contact:

Ausasi LLC — Tyler, Texas, United States
Email: ausasi.socials@gmail.com

When making a privacy request, we may need to verify your identity or account ownership before fulfilling the request.

34. Summary

PawTrack is designed to give pet owners a centralized way to document and organize their pets' seizure and veterinary information. Our core privacy commitments are:

- We do not sell or rent your personal information or pet information.
- We do not currently use third-party advertising.
- **Seizure videos always remain on your device and are never uploaded to our servers.**
- **We do not collect GPS or precise location data.**
- You control who you choose to share your records with.
- You can delete individual records and request deletion of your account.
- Deleted cloud data is intended to be removed from active systems and may remain in backups for up to 30 days.
- PawTrack is a tracking and record-keeping tool, not a veterinary diagnostic or treatment service.
- We use third-party services only as reasonably necessary to provide, maintain, secure, and improve PawTrack.
- We provide privacy rights according to applicable law.

End of Privacy Policy
